Head of the Department of "Business Administration and Logistics" prof.
U. Gafurov [Signature] « » 2023.

The defense will take place at the Tashkent State University of Economics in

« 30 » 2023. at " 10.00 " time.

Annotatsiya

Korxonalar faoliyatida transport logistika boshqaruvini rivojlantirish choralari ko'rish bugungi kunda korxonalar tizimidagi dolzarb mavzulardan biridir. Shu bois tadqiqot dovomida mavzu doirasida atroflicha ish olib bordik. Jumladan mavzuga oid boshqa tadqiqot ishlari, maxalliy va xorijiy olimlar qarashlari, ilmiy maqolalari hamda mavzuga oid maxalliy me'yoriy hujjatlarni o'rganib chiqib, adabiyotlar sharxi tayyorladik. Ilmiy ishining, amaliy ahamiyatini oshirish uchun, mamlakatimiz korxonalaridagi xususan **“Grand Open Invest Trade” MCHJ** faoliyatida transport logistikasini holati va ular bilan ishlash qay darajada amalga oshirilayotganligini, statistik malumotlar asosida ekonometrika taxlil usullari yordamida o'rgandik. Undan tashqari horijiy korxonalarini bu sohadagi tajribasi bilan ham tanishib chiqdik. O'rganilgan va taxlil qilingan ma'lumotlar asosida korxonalar faoliyatida transport logistikasini rivojlantirish choralari bo'yicha ilmiy va amaliy asoslangan xulosa, taklif va tavsiyalar ishlab chiqdik.

Kalit so'zlar: Korxonalar, transport logistika, statistik malumotlar, ekonometrika taxlil, transportni boshqarish tizimlari, tarqatish markazi, mintaqaviy tarqatish markazi, radio ma'lumotlar uzatish, milliy tarqatish markazi, biznesdan biznesga, mijozga biznes, axborot-kommunikatsiya texnologiyalari, logistika bo'limlari, usullari, tahlil, yuk, statistika, mahsulotlar, bozor, risk, xarajatlar, saqlash, ta'minot zanjirlari, grafik, kategoriyalarni boshqarish, inventarni saqlash xarajatlari, avtomobil transporti xarajatlari, mijozlarga xizmat ko'rsatish, boshqaruv, segmentatsiya, joylashuv to'plami, operatsiyalar, tizim, intermodal transport, talab zanjirini boshqarish, globallashuv, yaxshi amaliyot, mobil ma'lumotlar, ishlab chiqarishni rejalashtirish va nazorat qilish tizimlari, xalqaro savdoni boshqarish tizimlari, logistika, logistika va ta'minot zanjiri boshqaruvi orqali raqobatdosh ustunlik, logistika uchun rejalashtirish, moddiy talablarni rejalashtirish, mijozlarga xizmat ko'rsatish, tarqatish kanallari.

Annotation

Taking measures for the development of transport logistics management in the activities of enterprises is one of the urgent topics in the system of enterprises today. Therefore, during the research, we carried out extensive work within the scope of the topic. Among other things, we have prepared a literature review after studying other research works on the topic, views of local and foreign scientists, scientific articles and local normative documents on the topic. In order to increase the practical significance of the scientific work, we studied the situation of problematic transport logistics in the activities of "**Grand Open Invest Trade**" LLC in the enterprises of our country and to what extent work with them is carried out based on statistical data using econometric analysis methods. In addition, we got to know foreign companies with their experience in this field. Based on the studied and analyzed information, we developed scientifically and practically based conclusions, suggestions and recommendations on the measures for the development of transport logistics in the activity of the problematic enterprise.

Key words: logistic, organization, transport logistics, statistical data, econometric analysis, transport management systems, distribution center, regional distribution center; radio data communication, national distribution center, business to business, business to customer, information and communication technology, logistics departments, methods, analysis, cargo, statistics, products, market, risk, costs, storage, supply chains, graph, category management, inventory holding costs, road transport costs, customer service, management, segmentation, location package, operations, system, intermodal transport, demand chain management, globalization, good practice, mobile data, manufacturing planning and control systems, international trade management systems, information and communication technology, competitive advantage through logistics, logistics and supply chain management, planning for logistics, material requirements planning, customer service, channels of distribution.

CHAPTER I. INTRODUCTION

Today, it is hard to imagine without logistics in the business economy. Now it is the demand of the time to bring the transport logistics system in the activity of the enterprises to the state corresponding to the world standards. In this regard, Decree No. PF-5647 of February 1, 2019, "On measures to fundamentally improve the state management system in the field of transport" adopted by the President of the Republic of Uzbekistan.

The continuous development of world trade requires fundamental changes in transport markets, including the transport system of our country. The development of transport in accordance with international standards and the latest technologies has increased the interest of specialists in the field of development of forwarding services. Increasing and intensifying competition has led to the greatest emphasis on service levels these days. Since then, in the current complex conditions of the modern market, in order to retain existing customers and attract new ones, companies have to fulfill customer requirements and provide services at an increasingly high level. In connection with the current economic conditions, more and more attention is paid to quality problems in modern literature. Many foreign and domestic authors have always devoted an important place to the speed and quality of cargo delivery in their studies, especially the works of such classics as A. Feigenbaum, E. Deming, K. Ishikawa, S. Siro, J. Harrington can be highlighted. It is their research and development, as well as their practical application in creating a universal management philosophy, that helped many developed countries (USA, Japan, etc.) to become the leaders of the world economy today. However, the practical and theoretical problems of increasing the efficiency of transport companies, the quality of service and the complexity of the provided services have not yet been considered. The implementation of an automated system of speed and quality management in the activities of transport companies optimizes the process of product distribution from the manufacturer to the end user. This determines the relevance of this manual, the purpose of which
