Introduction	xiii
I Investment Fundamentals	1
1 Securities and Analysis	3
1.1 Introduction	3
1.2 Financial Investment	4
1.3 Investment Analysis	6
1.4 Securities	7
1.5 Non-Marketable Securities	8
1.6 Marketable Securities	9
1.6.1 Money Market Securities	9
1.6.2 Capital Market Securities	11
1.6.3 Derivatives	13
1.6.4 Indirect Investments	14
1.7 Securities and Risk	15
1.8 The Investment Process	16
1.9 Summary	18
2 Buying and Selling	21
2.1 Introduction	21
2.2 Markets	21
2.2.1 Primary and Secondary	22
2.2.2 Call and Continuous	23
2.2.3 Auction and Over-the-Counter	23
2.2.4 Money and Capital	24
2.3 Brokers	24
2.4 Trading Stocks	25
2.4.1 Time Limit	25
2.4.2 Type of Order	26
2.5 Accounts	26
2.5.1 Account Types	27
2.5.2 Margin Requirement	27

2.5.3	Margin and Return	28
2.6	Short Sales	29
2.7	Summary	31
II	Portfolio Theory	33
3	Risk and Return	35
3.1	Introduction	35
3.2	Return	36
3.2.1	Stock Returns	37
3.2.2	Portfolio Return	38
3.2.3	Portfolio Proportions	40
3.2.4	Mean Return	42
3.3	Variance and Covariance	42
3.3.1	Sample Variance	43
3.3.2	Sample Covariance	45
3.4	Population Return and Variance	48
3.4.1	Expectations	49
3.4.2	Expected Return	50
3.4.3	Population Variance	52
3.4.4	Population Covariance	53
3.5	Portfolio Variance	55
3.5.1	Two Assets	55
3.5.2	Correlation Coefficient	57
3.5.3	General Formula	58
3.5.4	Effect of Diversification	59
3.6	Summary	60
4	The Efficient Frontier	65
4.1	Introduction	65
4.2	Two-Asset Portfolios	66
4.3	Short Sales	75
4.4	Efficient Frontier	75
4.5	Extension to Many Assets	79
4.6	Risk-free Asset	81
4.7	Different Borrowing and Lending Rates	85
4.8	Conclusions	88
5	Portfolio Selection	91
5.1	Introduction	91
5.2	Expected Utility	92
5.3	Risk Aversion	96
5.4	Mean-Variance Preferences	100
5.5	Indifference	102
5.6	Markovitz Model	103

5.6.1	No Risk-Free	104
5.6.2	Risk-Free Asset	105
5.6.3	Borrowing and Lending	106
5.7	Implications	107
5.8	Conclusions	108

III Modelling Returns 111

6 The Single Index Model 113

6.1	Introduction	113
6.2	Dimensionality	114
6.3	Model and Estimation	116
6.3.1	The Model	116
6.3.2	Estimation	117
6.3.3	Validity of Assumptions	121
6.4	Return and Variance	124
6.4.1	Individual Asset	124
6.4.2	Portfolio Return and Variance	125
6.4.3	Diversification	128
6.5	Market Model	130
6.6	Applying Beta	133
6.6.1	Risk	134
6.6.2	Adjusting Beta	135
6.6.3	Statistical Adjustment	136
6.6.4	Fundamental Beta	137
6.7	Conclusions	138

7 Factor Models 141

7.1	Introduction	141
7.2	Single-Factor Model	141
7.3	Two Factors	142
7.4	Uncorrelated factors	143
7.5	Many Factors	144
7.6	Diversification	144
7.7	Constructing uncorrelated factors	144
7.8	Factor models	145
7.8.1	Industry factors	145
7.8.2	Fundamental factors	145

IV Equilibrium Theory 149

8 The Capital Asset Pricing Model 151

8.1	Introduction	151
8.2	Assumptions	152

8.3	Equilibrium Implications	154
8.3.1	Separation	155
8.3.2	Capital Market Line	158
8.3.3	Security Market Line	160
8.4	CAPM and Single-Index	163
8.5	Pricing and Discounting	165
8.5.1	Prices	165
8.5.2	Discounting	166
8.6	Market Portfolio	167
8.7	Extension of CAPM	167
8.8	Conclusions	168
9	Arbitrage Pricing Theory	171
9.1	Introduction	171
9.2	Returns Process	171
9.3	Arbitrage	174
9.4	Portfolio Plane	178
9.5	General Case	181
9.6	Implementation of APT	182
9.7	APT and CAPM	183
9.8	Conclusions	184
10	Empirical Testing	185
10.1	Introduction	185
10.2	Testing CAPM	185
10.2.1	Forms of CAPM	186
10.2.2	Initial Testing	187
10.2.3	Anomalies	190
10.2.4	Roll critique	191
10.2.5	Further Issues	192
10.2.6	Recent Tests.	193
10.3	Implementing APT	194
10.4	Conclusions	194
11	Efficient Markets and Behavioral Finance	195
11.1	Introduction	195
11.2	Efficient Markets	195
11.3	Tests of Market Efficiency	196
11.3.1	Event Studies	196
11.3.2	Looking for Patterns	196
11.3.3	Examine Performance	196
11.4	Market Anomalies	196
11.5	Excess Volatility	196
11.6	Behavioral Finance	196
11.7	Conclusion	197

V Fixed Income Securities 199**12 Interest Rates and Yields 201**

12.1	Introduction	201
12.2	Interest Rate Calculations	202
12.2.1	Significant Rates	202
12.2.2	Discrete Interest	202
12.2.3	Continuous Interest	204
12.3	Bonds	205
12.3.1	Types	205
12.3.2	Ratings and default	206
12.3.3	Cash and Quoted Prices	207
12.4	Yield-to-Maturity	209
12.4.1	Discount Bonds	210
12.4.2	Annual Coupons	211
12.4.3	Semi-Annual and More Frequent Coupons	212
12.4.4	Continuous Compounding	214
12.4.5	Factors	214
12.5	Bond Properties	215
12.5.1	Duration	215
12.5.2	Price/Yield Relationship	216
12.6	Bond Portfolios	218
12.6.1	Immunisation	218
12.6.2	Hedging	218
12.7	Conclusions	218

13 The Term Structure 221

13.1	Introduction	221
13.2	Yield and Time	221
13.3	Interest Rates and Discounting	221
13.3.1	Spot Rates	221
13.3.2	Discount Factors	224
13.3.3	Forward Rates	225
13.4	***Converting Interest Rates***	226
13.5	Term Structure	227
13.6	Unbiased Expectations Theory	227
13.7	Liquidity Preference Theory	228
13.8	Market Segmentation (Preferred Habitat)	229
13.9	Empirical Evidence	229
13.10	Implications for Bond Management	229
13.11	Conclusion	230

VI Derivatives	231
14 Options	233
14.1 Introduction	233
14.2 Options	234
14.2.1 Call Option	234
14.2.2 Put Options	236
14.2.3 Trading Options	237
14.3 Valuation at Expiry	237
14.4 Put-Call Parity	243
14.5 Valuing European Options	244
14.5.1 The Basic Binomial Model	245
14.5.2 The Two-Period Binomial	250
14.5.3 The General Binomial	253
14.5.4 Matching to Data	255
14.6 Black-Scholes Formula	256
14.7 American Options	258
14.7.1 Call Options	258
14.7.2 Put Option	260
14.8 Summary	262
14.9 Exercises	263
15 Forwards and Futures	265
15.1 Introduction	265
15.2 Forwards and Futures	265
15.3 Futures	267
15.3.1 Commodity Futures	267
15.3.2 Financial Futures	268
15.4 Motives for trading	270
15.4.1 Hedging	270
15.4.2 Stock Index Futures	274
15.4.3 Speculation	276
15.5 Forward Prices	276
15.5.1 Investment Asset with No Income	276
15.5.2 Investment Asset with Known Income	279
15.5.3 Continuous Dividend Yield	280
15.5.4 Storage costs	280
15.6 Value of Contract	280
15.7 Commodities	281
15.8 Futures Compared to Forwards	282
15.9 Backwardation and Contango	282
15.10 Conclusions	283

16 Swaps	285
16.1 Introduction	285
16.2 Plain Vanilla Swaps	285
16.2.1 Interest Rate Swap	286
16.2.2 Currency Swaps	287
16.3 Why Use Swaps?	290
16.3.1 Market Inefficiency	290
16.3.2 Management of Financial Risk	290
16.3.3 Speculation	292
16.4 The Swap Market	292
16.4.1 Features	292
16.4.2 Dealers and Brokers	294
16.5 The Valuation of Swaps	295
16.5.1 Replication	295
16.5.2 Implications	297
16.6 Interest Rate Swap Pricing	297
16.7 Currency Swap	299
16.7.1 Interest Rate Parity	299
16.7.2 Fixed-for-Fixed	300
16.7.3 Pricing Summary	305
16.8 Conclusions	305
 VII Application	 307
17 Portfolio Evaluation	309
17.1 Introduction	309
17.2 Portfolio Consturction	309
17.3 Revision	309
17.4 Longer Run	309
17.5 Conclusion	309
 VIII Appendix	 311
18 Using Yahoo!	313
18.1 Introduction	313
18.2 Basics	313
18.3 Symbols	314
18.4 Research	315
18.5 Historical Stock Prices	315
18.6 Options	315
18.7 Creating a Portfolio	315
